Weihnachtlicher Sternkranz

Instructions No. 1031

Difficulty: Beginner

Working time: 20 Minutes

This **star from Willow** with its harmonious colour scheme is completely natural. Effectively placed Nature-elements like Fir and Jute are particularly effective here. Classic Christmas-Article, like the baubles, conjure up a festive atmosphere and transform this wreath of stars into a modern Advent arrangement or even a wonderful door wreath.

And it's that easy:

Cut off the branches from Fir and place them around the star, fix them with hot glue. Alternatively, frame the star with a fir garland.

Place a piece of Raffia along the star contour and fix it in the star corners with hot glue. Conceal the beginning and the end by using the Jute-Stick a loop over it. Decorate the circle of stars with the small stars and the balls, which you can carefully apply with hot glue.

First, fold the light Jute ribbon, over the dark Jute ribbon into a soap. Knot the loop together with natural bast and attach it to the willow star. Then use the natural bast-Ribbon as a hanging thread for decorative Jingles.

Decorate the willow star with other accessories such as Christmas Balls and stars - simply stick them on with hot glue.
Finally, knot a hanging tape to the star, using another piece of Jute ribbon or some bast threads.

Must Have

VBS Willow Star

Diameter (outside): 30 cm
Material: Willow

6,99 €
