

Anleitung: farbenfrohes Frühlings-Tischgesteck

Instructions No. 1094

With this table decoration you bring colour into your life! With the planting bowl handle basket and some colourful accessories, decorating becomes child's play.

And it's that easy:

How do I prepare the crafting of a table arrangement?

The basis for table arrangements is a planting bowl and a basket or similar container to fill. Whether you make it with fresh or artificial flowers - flower paste, plug wire or Romanesque, filling material such as moss, scissors and hot glue belong to the basic material in the Floristry.

In addition, we have used artificial grasses, scattered flowers, the ribbon "Ziehblume" and a fabric bird for our craft idea

How do I make a table arrangement?

Place the basket in front of you and cut a sufficiently large piece Flower arrangement foam . Press this into the planting basket. With a little moss, fixed with roman glue or hot glue, the Flower arrangement foam is well covered

The beautiful large flowers are made from the bow ribbon "Ziehblume": simply select five to six leaves of the bow ribbon, pull them together with the pulling thread and knot the thread. The flower is shown to its best advantage when a scattered flower is glued on with hot glue as the centre of the flower
In order to be able to process the ribbon flowers in the arrangement, the end of a plug wire is now bent

into an eyelet for each flower. A flower is glued onto this eyelet.

The large flowers can now be put into the basket. Arrange grass picks around the flowers. These will create abundance in the arrangement.

The cloth bird is now positioned centrally at the front of the basket and fixed with hot glue. Arrange more small scattered flowers in the arrangement according to your own taste

Your table decoration is now ready and will certainly give you a lot of pleasure.
