

Anleitung: Weihnachtlicher Lichtkasten

Instructions No. 1380

🔪🔪🔪 Difficulty: Advanced

🕒 Working time: 45 Minutes

Create a **magical glowing decoration for the Christmas season**. Design the light box, hide the lights in the **light box** - enjoy!

Here's how it's done

Prime the light box and the wood insert with white paint.

While the primer is drying, a suitable piece of star foil (**approx. 26 x 26 cm**) can be cut to size. Also the **Napkin** / the napkin motif is now cut to size, freed from the lower paper layers and stuck onto the star foil with Napkin glue or spray glue.

Mix a light moss green and apply this **colour with** a Paint sponge on the complete light box. Carefully add white accents to the still wet paint at the edges with brush, sponge and white paint.

Stenciling You with white Handicraft paint the stars and the squiggles on light box and star foil. Sprinkle some white glitter into the still wet paint.

Next, stick the star foil with tape under the coloured changing motif. Wipe carefully over the edges of the light box with a black Ink Pads This will give your decoration even more optical depth. Finally install the light chain inside the light box only .

Extra handicraft tip

Our light box and the matching interchangeable motifs can be designed in many different ways. An alternative creative idea is, for example, simply painting and patting with decorative snow and pastel Handicraft paint. Simply stick on a few stars as accessories and arrange them together with white Pompoms and fir green.
