

Coasters made from craft blocks and Raysin

Instructions No. 3057

🔪🔪🔪 Difficulty: Advanced

🕒 Working time: 2 Hours

If you're looking for a stylish way to decorate your home, why not try our craft instructions for **coasters** made from **craft blocks and Raysin**?

With these simple instructions, you can create your own **coasters** in no time at all and add a personal touch to your home.

It's that simple:

First protect your workstation with a handicraft mat.

Then glue 4 **VBS craft blocks** together on the long, narrow side. Once the glue has dried, cut the blocks to a length of 9 cm using a saw. This will give you a square measuring 9 x 9 cm.

Now loop the ends and place the square in the centre of the "**Square coaster**" **silicone casting mould**.

Now mix approx. 2 tablespoons of **Raysin** with water to make a creamy mixture and fill the casting mould with it. Gently tap the mould several times to release any air bubbles.

After approx. 30 minutes drying time, you can carefully remove the casting from the mould. Then clean the edges of the inner surfaces with sandpaper.

Then glue a **VBS coaster** made of MDF wood under the moulding using handicraft glue.

Tip: To protect the craft blocks from moisture, coat them with VBS acrylic varnish!
