

Create honey soaps

Instructions No. 2883

🔪🔪🔪🔪 Difficulty: Beginner

🕒 Working time: 3 Hours

Dive into the fascinating world of natural body care by pouring your own honey soaps. Honey soaps are not only gentle on the skin, but also make great gifts when beautifully packaged. In this tutorial you will learn how to make your own individual honey soaps.

You need approx. 60 g of organic cast soap per bar of soap. Heat it in a melting pot or alternatively in a melting ladle over a water bath. Add soap colour and fragrance oil to the melted soap.

Then pour the mixture into the mould and let it harden completely. After about 4-5 hours you can carefully remove the soap from the mould.

For the liquid soap, mix approx. 300 ml of base gel with soap colour, fragrance oil and cosmetic emulsifier. Then pour the soap into the pump bottle.

Would you like to give the soap as a gift or add the finishing touch? Use natural papers, silicone stamps and motif punches to make decorative banderoles and gift tags.
