DIY lip care with coconut

Instructions No. 2635

Difficulty: Beginner

Working time: 1 hour 30 Minutes

Beautiful lips need the right care. Natural and nourishing ingredients such as coconut oil and beeswax help to moisturise and intensively nourish the lips.
In these instructions you will find a simple recipe for a homemade natural lip care. This can be beautifully packaged after preparation and can also be given as a gift.

Make lip balm

First melt 1 tbsp beeswax pastilles in a melting pot. Add 2 tbsp coconut oil and mix everything together well.

Pour the liquid mixture into the mixing cup and then pour it directly into the tubes. Alternatively, you can transfer the mixture from the melting pot using a funnel.

Design the gift packaging

While the lip balm is drying, you can decorate the box.

Paint the lid with craft paint. In our example, we chose a pastel olive green.

After the paint has dried, you can stick a strip of cork on the lid.

Paint the wooden lettering with craft paint as well and glue it to the lid after it has dried.

Stick cork on the tubes as soon as the lip care has dried.

Make small tags as you like. Simply stamp white cardboard with the design of your choice and cut it out after it has dried. Attach the tags to the tube with ribbon.

Line the decorated box with straw silk and place the lip care inside - a great gift is ready.

Must Have

Coconut oil, refined, 100 ml

Fill volume: 100 ml

7,49 € (1 l = 74,90 €)
