

Easter flower pots with Chalky Color

Instructions No. 1413

🔪🔪🔪 Difficulty: Beginner

🕒 Working time: 30 Minutes

Simple **Terracotta pots** quickly become the new eye-catchers on the windowsill with Chalky **Color paint** and a little extra handicraft material.

Painting with Chalky Color paint

Prime the pots with Chalky Color paint. To create an antique look, apply a layer of Chalky Wax when dry and, when the wax is dry, apply another layer of colour in a contrasting shade.

With Sandpaper you now wipe carefully over the painted pots. The first layer of paint will shine through the protective wax layer on the sanded surfaces, creating the antique effect.

How to make the rabbit flowerpot

Download the design template. Transfer the bunny ears to brown Textile felt. Cut them out twice. Glue a thin wire to each ear with hot glue. Cover this wire by gluing the double bunny ears on each.

Paint the face on the pot with covering colour pencils. A painted wooden hemisphere, approx. Ø 10 mm, is suitable for the nose. Glue this onto the face.

Plant the pot and finally put the rabbit spoons in it.

Easter eggs in the pot

Cotton wool eggs can also be painted with Chalky paint. Choose different colours to match the Chalky Terracotta-pot and colostraste different coloured Easter eggs. Put each egg on an aluminium wire

Take a piece of aluminium wire and bend the ends into decorative curls using round nose pliers. Bend your own decorative wires in this way around some of the Easter eggs.

Small loop - big effect

A potted daffodil plant with yellow flowers and green leaves, decorated with a bunny face and large brown bunny ears, sitting on a wooden surface.
