The magical winter wonderland: how to design your own Ecketagere

Wintertime is the perfect opportunity to bring out your creative side. A self-designed **corner agere** can not only only be the perfect **highlight for your home**, but also brings a cozy **winter atmosphere** into the house. In this step-by-step guide, we explain how to create an enchanting corner agora with sparkling LED tea lights and winter decorations.

Instructions for a magical corner bag

Imagine coming home and being greeted by a lovingly designed winter landscape. Our instructions show you how to make this little wonder yourself using simple tools. The steps are easy to understand, so even beginners can follow along without any problems. In the end, you'll have a dreamlike decoration that is guaranteed to brighten up your home.

Step 1: Prepare the corner aisle

Start by painting the edges of your corner agere with white handicraft paint or your preferred color. This gives the piece a wintry feel and forms the basis of your decoration. Make sure to apply the paint evenly and allow it to dry completely before continuing. The Time to dry: varies depending on the thickness of the paint layer, but one hour should be sufficient in most cases.

Step 2: Decorating with figures and trees

Now comes the creative part! Decorate your Ecketagere with Christmas figures. These cute miniature figurines will instantly bring a Christmassy atmosphere to your project. Complete the whole thing with small miniature Christmas trees, which you can place strategically on the different levels of the corner drawer.

Step 3: Filling absorbent cotton for the snow effect

To add the finishing touches to your winter wonderland, spread some fluff over the different levels of the corner aisle. The fluff simulates freshly fallen snow and makes the scene even more realistic and magical.

Step 4: Lighting effects with LED tea lights

Last but not least, use the VBS LED tea lights to make your winter wonderland shine. The LED tea lights have a practical timer that keeps them lit for 4 hours and then switches them off automatically. After 20 hours, the tea lights switch on again automatically. This provides pleasant lighting without you having to remember to switch the lights on and off every time.

We hope you have enjoyed these instructions and are now looking forward to creating your own Ecketagere. You can find everything you need for this project in our online store. Click through our range and order the high-quality craft materials so you can get started right away.
