

Farbenprächtige Dosen im indischen Stil

Instructions No. 301

Full of energy and yet full of harmony - India is a vibrant subcontinent full of exotic colours and smells. The intense colours also play a major role in everyday life, which is expressed not least in the Indian colour festival "Holi". Whether consistently combined or as individual design elements in an otherwise rather restrained living room decoration - once you have been gripped by the passion for this world of colours, you will never get rid of it. The different colours are harmoniously combined on the round tins. Gemstones and golden motifs are the perfect complement.
