

Firs from polystyrene cones

Instructions No. 1682

Difficulty: Beginner 🍴🍴🍴🍴

Working time: 20 Minutes

What could be better than an impressive home decoration that is homemade and at the same time takes little time? These pretty fir trees are conjured up in a few minutes and only needs little material. The great thing is: the little trees can also be made together with children.

And it's that easy:

First of all, take a **Polystyrene cone** in the desired size at hand. Make a glue dot with [hot glue](#) at the bottom of Polystyrene cone and start to wrap the wool cord **around** the cone. You should fix the string with hot glue in places to prevent it from slipping away later. In this way you can design the styrofoam pans **in** different sizes. Finally, a star is formed from **silver wire**, which should decorate the top of the Fir

Tip: To get evenly shaped stars, you can take a Cut out form to help you and bend the wire around the form.

Must Have

[Polystyrene cone 20 cm](#)

● **1,49 €**
