Flower pots with a face

Instructions No. 2122

Difficulty: Beginner

Working time: 4 Hours

This funny couple has flowers growing out of their heads. A cute idea that is easy to implement and can also be a great gift idea. For example, how about flower pots that look like friends, parents or family members.

Prime the clay pots with craft paint in the shade ivory. As soon as the paint has dried, you can colour the pots. Craft paints and markers are also suitable for this. Allow the pots to dry well after designing them.
Print out the template and transfer the faces onto the round clay pot with a pencil. Design the faces with markers.
Now glue the clay pots together and decorate the top clay pot with flowers and moss. In our example we used artificial flowers. These cannot wither and are therefore a permanently beautiful decoration.
