Elegant flowers made from natural paper and beads: a DIY-tutorial

Step 1: Preparing the flower shapes

To start your creative craft projects, first download the **templates** for the flower petals. You have the option of making two types of flowers. To do this, transfer the templates to **natural paper** and cut them out carefully. The narrow hearts are folded once in the middle. Fold the wide hearts at the sides along the dotted lines. These folds give your petals shape and volume. Then glue the petals onto a large circle, preferably made from the same paper as the flowers. This ensures a harmonious overall look.
