Funny fishing game

Instructions No. 2215

Difficulty: Beginner

Working time: 6 Hours

This fishing game is great fun for children. The game involves trying to catch small fish from the "pond" using a fishing rod with magnets.

Designing a pond

1. Prime the cardboard frame with VBS craft paint in antique white. Once dry, apply a second coat of paint.

2. Paint the inside of the frame with craft paint in mint.

3. After drying, attach the printed layer of the "Wale" napkin to the outside of the frame using napkin varnish.

4. Prime one sheet of embossing foil with antique white.

5. Roughly cut out the octopus from the "Little Octopus" napkin and stick the printed layers onto the embossing foil with napkin varnish. Allow the varnish to dry completely.

6. Now highlight some parts of the octopus by carefully pressing the desired areas outwards on the back of the embossing foil with embossing pins.

7. Cut out the finished octopuses with tweezers, decorate with wiggly eyes and stick to the cardboard frame with craft glue.

Decorate the fish

1. Cut the ribbons from the pendant fish and prime them with antique white as well.

2. As soon as the paint has dried, you can decorate the fish with other colours, wiggle eyes and mirror mosaic.

3. Attach a magnet to the edge of each fish with VBS craft glue.

Make the fishing rods

1. Paint the lantern sticks with VBS craft paint in mint.

2. After the paint has dried, the spiral wires can be pushed onto the lantern rods.
