

Gift box with winter landscape

Instructions No. 2692

🔪🔪🔪🔪 Difficulty: Beginner

🕒 Working time: 1 hour

Would you like to wrap your gifts for Christmas in a particularly original way? Then these gift wrappings with winter landscape are just the thing. The packaging is quick and easy to make and will bring a smile to the face of the recipient at Christmas.

Designing gift boxes

First paint the chipboard boxes with Chalky Color and then let the paint dry.

Now you can cut out a desired motif from the napkin and stick the top printed layer onto the box with napkin varnish.

After drying, stick double-sided adhesive tape around the edge of the lid and decorate the whole thing with ribbon.

Then stick the miniatures onto the lid with hot glue. Tip: If you wish, you can also decorate the winter scene with some decorative snow.

Would you like to learn how the napkin technique works? Take a look at our informative video on the subject.
