Glowing wooden stars

Instructions No. 1687

Difficulty: Beginner

This Christmas DIY light is made within a short time. The decorative stars certainly fit into every home.

Craft idea for impatient people

First use the outer contours of the wooden stars as a template to <u>cut</u> the star foil. Cut the Lace of the foil stars, remove narrow triangles. Place the film in the stars and use a folding leg or scissors to draw a seam in the film. Before gluing it in, prime the wooden stars with <u>VBS Chalky Color paint</u> in antique green and Stone Grey.

After drying, the star foil is glued in with doublesided Adhesive tape, into the inside of each star a <u>Fairy lights</u> fixed. Arrange the stars together with some fir green and Christmas Balls in your home.
