Hair clip Fairytale

Instructions No. 2446

Difficulty: Beginner

Working time: 3 Hours

Your child wants a **hair ornament** that is romantically playful and perfect for a princess or fairy. Our idea with the **wings** on a hair clip is super cute and can even be made by children themselves with a little help. Ideal for children who love decorations in their hair or for the next fancy dress party.

This is how you design the hair clip:

Place the **template** under the **shrink film** (the rough side of the film is on top) and transfer the individual motifs with the liners.

Colour individual areas to taste with **fibre painters**.

Cut out the motifs. Shrink the **shrink film** in the oven according to the package instructions.

Then seal the painted side with **spray paint** for extra protection. In our example, we chose a spray with glitter for extra shine.

Cut **foam rubber** to clasp size and glue this to the top of the clasp mechanism. Decorate with **Flaky Glue** and **glitter stones** and glue on **ribbons**.

Now glue on the wings:

Start with the "big" wing and glue it flat onto the barrette. As soon as the glue has dried, glue on the two small parts at a slight angle. Support the wings while they are drying to keep them in position.

Must Have
