Halloween Salt Dough Figures

Instructions No. 2359

Difficulty: Beginner

Working time: 2 Hours

Are you already haunted? Our **cute and spooky wreath** is very easy to make with the **salt dough mix**. Simply cut out the **figures** with cookie cutters, decorate them beautifully and stick them to the wreath. You already have a great **Halloween decoration**.

This is how it's done:

First mix the **salt dough mixture** with a little water and knead the dough well. It is kind to the skin and ideal for craft work with children and groups.

Roll out the dough with the roller and cut out the figures with the cutters. The cut-out figures from the modelling clay dry in the air and harden within 1 - 2 days, depending on the thickness of the moulded parts and the ambient temperature.

Now you can paint the **Halloween figures** with **VBS craft paint**.

Use craft glue to stick on the **wiggly eyes**.

Then glue the salt dough figures to the wooden ring.

For a **cobweb effect** on the wooden wreath, pull apart the **cotton wool** and attach it to the wooden ring with a little glue.

Ready is a spooky wreath for the door or as a decoration in the house.
