Instructions for a paper crown

Instructions No. 1280

These **instructions** will help you to quickly make a beautiful paper crown - for a child's birthday, party or carnival.

themenset_1357_display_2

Here's how it's done:

To do handicrafts, only has to download the motif template, transfer it to yellow Craft cardboard sheet and cut it out

After the crown is decorated with Acrylic-gemstones and effect liners according to your personal taste, glue the crown together - done.

Extra tip:
The motif template is created for a standard head size. If the crown is too big, simply cut out one tooth less. It is also possible to provide the crown with an elastic band so that it can be adjusted even more individually to the head (for children's crowns). To do this, cut a slit at each end of the crown into the Paper , a rubber-Cord is pulled through. The ends of the Cord are knotted and glued to the inside of the crown.
