Jewellery with Pouring

Instructions No. 1960

Difficulty: Beginner

Working time: 1 hour

Pouring is a universally popular technique for creating Stretched Canvas spectacular colour gradients and patterns. The different pouring colours are often layered on top of each other in a cup and finally tilted over the cup. Now the pouring colors are also available for jewelry. So you can create unique and beautiful pieces of jewellery, which no one else has for sure.

Layer the **pre-mixed colours** in a **cup** and stir very gently with a bamboo skewer **to** create a marbled colour gradient

Insert the **Wooden balls** on the tree-bus skewers and dip the balls in the colors. Carefully tap off excess paint over the cup. Let the balls dry overnight. **Tip:** The best way to do this is to stick the bamboo skewers into Flower arrangement foam, a Sand filled cup or similar. Now thread the two **small beads onto** the **Creoles**The **large Pearl**one together with a leather tassel **on** a leather strap

Dip the **pendant glass bottle** up only to half in the paint. Let it dry as well. Afterwards the pendant can be easily **threaded** onto a leather strap

The paint can be poured into the **carbochons** directly from the cup. After drying, simply apply an **epoxy sticker** and you can further process the pendant to your desired piece of jewellery. How about for example with a fancy **Bracelet**? Simply use a **carbochon with two eyelets** and attach a **leather strap or** similar to it.
