

Key board made from craft blocks

Instructions No. 2965

Difficulty: Beginner 

Working time: 3 Hours

Craft blocks are extremely versatile and can be used creatively. Discover here how you can use the small blocks to make a storage board with a key hook and post box.

First glue 7 craft blocks together on the long, narrow sides to form a square. Make 5 more squares in this way and then glue all 6 squares together to form a flat wooden panel. Leave everything to dry. The back wall of the key board is now finished.

Use glue to make storage shelves for your key board from 3 or more craft blocks. Now you can decorate all the parts with paint and stencils.

This makes stenciling work particularly well:

Treat the painting stencil with spray glue and then position it on the board. Pick up some paint with a dry dabbing brush and carefully dab it through the motif on your painting stencil. As soon as you have dabbed on the colour, remove the stencil and clean it immediately with water.

Loop

To hang the key board up later, first attach picture eyelets to the back of the key board. Then tie a ribbon to the eyelets.

Attach storage compartments

Now glue the storage compartments you have made to the back of the key board. Attach game pieces to them as well: these make great knobs on which the keys can be hung later.

Must Have

VBS Handicraft blocks, Beech wood
