Lantern bottle with glass engraving

Instructions No. 2022

Difficulty: Beginner

Working time: 12 Hours

These lantern bottles with star motif provide atmospheric light. The bottles were Glass engraving designed in advance. With our free template, you too can create the design in no time at all.

This is how it's done:

Important: When engraving on glass, make sure you work only with little pressure. Otherwise it can happen that the glass splinters or even breaks.

It works step by step

1.Download free **motif template**, print it out and cut out motifs.

2. Place the stars on the **bottles**.
3. Use a **water-soluble pen** to copy the motifs.
4. Use the **conical attachment** for engraving.
5. Trace the stars with the **battery-powered engraving pen**.
6. Then engrave the spaces in between.
7. Wash the bottles after engraving to check if all spaces are filled.
8. Place **tea light** in the bottle and hang it up.
