Peddigree Floor Lamp

Instructions No. 1327

With this **imposing floor lamp** a **foil cylinder** stands in a filigree body of **wooden rods and Rattan cane**.
The **extraordinary design makes this** lamp the crowning glory of your country house decoration **!**

And it's that easy:

Assemble the **lamp socket** according to the instructions and fix it with **wire** in one of the small metal rings (see picture 1).

The **Lamp foil** to 51 x 98 cm and cut to size with **Straw silk paper** while leaving the **adhesive tab** (see sketch) free - do not peel off the **protective paper** at first.

Afterwards the **Straw silk paper** with **Napkin varnish** seal it.

Into the **Lamp foil** pierce the holes with the **needle** according to the sketch

Insert the ring with **nylon thread** into the **Lamp foil** sew (cross the threads inside the ring, on the outside you can see only a small loop) - see picture 2.

Then sew a small **metal ring** each **with** leather straps **to the** upper and lower edge.

Pull off the**protective foil** from the **adhesive tab**, the **Lamp foil** glue, knot together **nylon threads and leather straps firmly**.

To allow the heat of the light bulb to escape upwards later, cut out one of the rattan tube bottoms **as a ring**.

Picture 2

Tip: It is very helpful if a second person forms Lamp foil around the ring.

Sharpen the **round bars with** a knife so that they fit into the holes in the bottoms.

Rattan cane Colour the **floorsand** round bars **with** a wood glaze mixture **of chestnut** and Ebony , and paint the large metal rings with **brown decorative lacquer .**

Glue the **round bars into** the base plate **with super glue**.

33 cm from bottom edge **fix** one **lamp ring** inside on six **round rods** with brown **string**, put the second ring provisionally over the rods **so** that they are bent into the right shape for braiding.

At the lower edge **18 rows** with **Rattan cane** plait, plait six rows each under and above the fixed lamp ring (see picture 3).

Now fix the second lamp ring **33 cm** from upper edge inside the round bars.

Glue the **rod ends** in the **Rattan cane ring** (see picture 4).

Turn the lamp upside down and fix the **Rattan cane** weave in the rhythm "before one, behind one", i.e. each bar goes around the next one on the outside and stays behind the next but one on the inside (see picture 5)

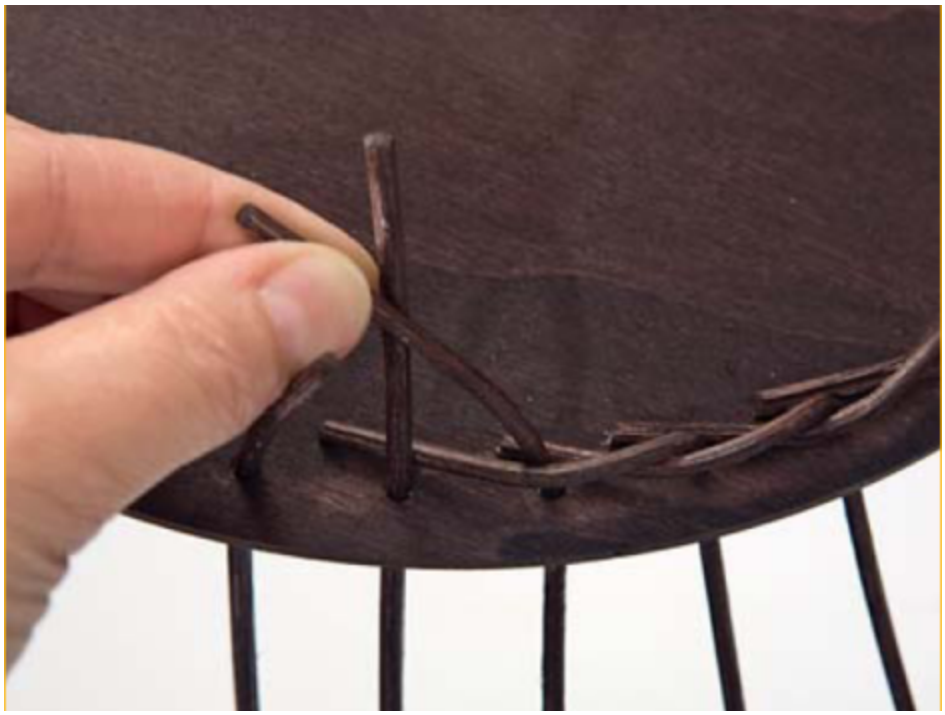

Tip: To make Rattan cane nice and flexible for braiding, soak it in warm water for several hours before use.
