

# Pusteblume im Fadenspann-Design

Instructions No. 668

🧵🧵🧵 Difficulty: Advanced

🕒 Working time: 0 Minutes

This stylistic dandelion is Warp yarn worked as a thread tension graphic with felt cord. This gives the old technique a modern look that is easy to rework.

**And this is how** it works

First prime the decorative sign in brown and wipe over the edges with antique white after drying.

Place the template for the dandelion on the shield and protrude with the tingle needle. Remove the pattern and tap the decoration-Pins into the perforations.

Tie the knot Warp yarn on a needle and tighten further. Put a piece of white felt cord around the middle.

Stick on a piece of green felt cord as a stem.

For suspension, twist Cord green and white into each other and knot them through the eyelets.

This idea is timelessly beautiful!
