Shining ghosts

Instructions No. 676

Difficulty: Beginner

Working time: 20 Minutes

Soon it will be Halloween again, the time of the creepy characters. There the two ghosts rattle their chains and they even glow in the dark.

Here's **how it works**

Before you start doing handicrafts, you set your table with old newspapers so it won't get dirty. Then you unroll the entire modelling bandage and cut it into two parts of equal length, one for each ghost. Soak the modelling bandages in a bucket of water and wrap them immediately around the Polystyrene cone. They must then dry for about 24 hours before you paint them with noctilucent paint.

While the paint is drying, cut off pieces of wire of different lengths with the side cutter and bend them into curls and curls with the jewellery pliers. Drill small holes for the arms and the "curl" of the ghosts into the cones and put the wires firmly into them. You paint the faces with the Pearl-Pen up.

When the faces are dry, divide the two chains into pieces of different lengths and hang them in the wire arms. You can also bend up single chain links and hang them into other chain links. At the end of the silver Chain you hang a lantern and your Halloween ghosts are ready.

Must Have

Polystyrene cone 26 cm

Height: 26 cm
Material: Polystyrene

2,19 €
