Summer drinking glass covers made from Hama beads

Instructions No. 1484

Difficulty: Beginner

Working time: 45 Minutes

There you go:

Practical, decorative and, above all, very easy and very quickly made: Protective covers for drinking glasses!

That's how it works:

You need besides the Hama-Pearls only round Hama-Pegboards. Place the beads according to your personal taste or as in this idea in the look of a sliced fruit: Lemon, Lime, Orange, Apple or Melon. The middle of the plate is cut out to leave a small opening for the straw later

The protective lids in the shape of fruit can also be laid very well by children from 3 years of age. As soon as the pattern is ready, the covered plate is covered with permanent iron-on foil and fixed together by ironing.

Attention: The stronger you press the iron and the longer you iron, the stronger the beads will be connected to each other, the stronger the Hama-Pearls are also merging more and more visually

Summertime fun for young and old

Are you looking for more great summery craft and decoration ideas?

- **Instruction 1485** shows you how to colourfully design **stylish flamingos** for outdoor use
