Suncatcher "Sunshine"

Instructions No. 3019

Difficulty: Beginner

Working time: 3 Hours

Bring some sunshine into your home with this suncatcher! The acrylic forms are cleverly designed with alcohol ink paint. With little effort, you can create a great decoration that scatters shimmering rays of light in your room. Have fun crafting!

Preparation

For this idea, you will need 1 acrylic disc in Ø 13 cm, 5 acrylic balls in Ø 3 cm and 3 acrylic balls in Ø 4 cm.

Before you start with the color design, make sure that the ball halves are in front of you with the hanging loops facing upwards.

So that you can hang the acrylic disc and balls up properly later, you need to drill another hole on the acrylic disc exactly opposite the existing hole and two more holes next to it at equal intervals. The acrylic balls will be hung from these later.
Our Dremel multifunction tool and the Dremel 628 precision drill bit set are suitable for drilling.

Colored design

First clean the acrylic forms, so that they are free of dust and grease. Drip the Alcohol Ink colors onto the acrylic disc and balls. Use the bellows to distribute the drops of paint in different directions. The resulting noses look very effective on the acrylic . If the paint has not flowed far enough, use a few drops of extender: drip onto the paint and then spread with the bellows.

keep
your
face

the
sunshine

Mirror mosaic and lettering

Once everything is dry, put the ball halves together and cover the edges with mirror mosaic. Print out the motif template and transfer the lettering to the acrylic disc. using the permanent marker included in the Alcohol Ink Set

Finally, you can join all the parts together with pearl thread and then hang up the new suncatcher.
