

Winterliche Lichtgläser

Instructions No. 1638

🔪🔪🔪 Difficulty: Beginner

🕒 Working time: 45 Minutes

Create **beautiful light glasses** for yourself. Very easy and quick to rebuild and impressive to look at.

Here we present you **three possibilities** to make great light glasses that give a beautiful light.

Variant 1: Stick **relief stickers** onto the **glass** and dab them on the **glass**, preferably with a **Paint sponge** with **glass color**. Remove the **stickers** while still wet, if necessary use tweezers to rework the edges.

Variant 2: The glasses can also be **dabbed** by them with glass paint and then **Sandpaper** carefully grinded. This will give you a beautiful effect. Our large white glass is made with this method. Additionally you can decorate the glass with ribbons and Embellishment

Variation 3: Another possibility is to apply a lettering with a 3D **gel** and let it dry. Then **dab** the glass again with glass paint and remove the lettering while still wet. A wow-effect guaranteed! In our example, we have chosen the lettering "Let it snow".
