Wooden box with resin glaze

Instructions No. 2427

Difficulty: Advanced

Working time: 6 Hours

This **beautiful box** has a great shiny surface - designed with **resin**. So you can design the lid according to your wishes and the **shiny protective layer** protects and looks very classy. The box is perfect for gift wrapping or as a sweet box as well as a gift of money.

This is how the box is designed:

First paint the **surface of the lid** of the **wooden box** in the colour of your choice. We chose the colour "berry" for our box.

After the paint has dried, you can write on the lid with a **Posca marker** or embellish it with a drawing. It looks especially nice if you draw shadow lines with a fine micron pen.

Now sprinkle some **glitter** on the surface.

Mix the coating **resin** according to the instructions. Drop and spread it onto the lid using a pipette. It is important that the box is completely straight so that the resin does not run down.

Once the **coating resin** is completely dry, you can now embellish the box further . For example, you can **stick** on **ribbons** and **scatter decoration** stick them on. To apply a ribbon, stick double-sided tape to the edge of the lid **adhesive tape** tape to the edge of the lid. Remove the protective film from the adhesive tape and press the decorative-ribbon onto the adhesive surface.

Must Have

Epoxy Resin "Glass' Lack", 150 ml

23,99 €
